-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2 and 14-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Burr, et al. (6,731,020).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Burr discloses a steering column assembly comprising a steering column 10 having a connection for receiving a steering wheel; a column support coupled to the steering column for mounting the steering column to a support structure of a vehicle; at least one electrical device operatively attached to the column support for an operator to control the vehicle; and an on-board processor 20 carried by the column support for receiving and consolidating signals from the electrical devices and having an electrical outlet for connection to a vehicle communications bus for sending data to and from the vehicle communications bus 26, 28. Inherently, at least one electrical device includes a steering sensor electrically connected to the on-board processor for sensing the rotational movement of the steering wheel. As shown in figure 1, Burr

Art Unit: 3616

teaches at least one electrical device includes a turn signal switch electrically connected to the on-board processor, a windshield wiper switch for controlling a windshield wiper, and a cruise control switch for controlling a cruise control system. Burr teaches a clockspring coil 38 supported by the column support for providing an electrical connection between the on-board processor and the steering wheel. With respect to claim 18, Burr teaches an airbag supported by the column support for protecting the operator in the event of an accident of the vehicle.

Allowable Subject Matter

3. Claims 3-13 and 19-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye M. Fleming whose telephone number is (571) 272-6672. The examiner can normally be reached on M-F (9:00-5:00).
